(54) Title: METHOD FOR THE MANUFACTURE OF CARBOXYALKYLINULIN

(57) Abstract: A method for the manufacture of carboxyalkylulin is disclosed comprising preparing an aqueous medium containing dispersed therein a halogenoalkylcarboxylate, adding to the carboxylate containing medium, under substantially neutral pH conditions, an inulin followed by heating this mixture to a temperature in the range of from 60 °C to 90 °C and proceeding with the reaction at alkaline conditions, pH 8-12, while simultaneously adding additional halogenoalkylcarboxylate and alkali hydroxide. The carboxyalkylulin so formed is recovered in a manner known per se.
